SKILLS & INTERESTS

Languages: Javascript | Python | Java | C++ | Typescript | Bash | SQL

Frameworks & Tools: Spring Boot | React | Node.js | Git | Docker | Linux | REST APIs | JUnit | Express.js | UX/UI | GraphQL | Tailwind.css

Cloud & Databases: AWS (EC2, S3, Lambda, DynamoDB, Cloudwatch, IAM) | MySQL | PostgreSQL | MongoDB

Concept : OOP | Agile/Scrum | CI/CD | Version Control | Data Structures | Algorithm Design | SDLC

WORK EXPERIENCE

Tech2High

Falls Church, VA

Junior web developer

Dec 2024 – June 2025

- Built a REST API service in Java (Spring Boot) that aggregated data from 3 internal systems, reducing manual report generation time by 60% for a 20-person operations team.
- Wrote unit and integration tests achieving 85% code coverage, catching 12 pre-production bugs before deployment.
- Collaborated in a 6-person Agile team using Jira and Git, participating in daily standups, sprint planning, and code reviews.
- Automated a weekly data pipeline using Python scripts and AWS Lambda, eliminating 4 hours of manual work per week.

Arlington, VA

Math tutor

June 2017 – Present

- Tutored over 300 students in SAT Math and Calculus, helping them improve their scores and achieve their academic goals.
- Developed and implemented an engaging robotics curriculum, teaching block coding to elementary and middle school students, fostering a passion for STEM education for Sylvan Learning.
- Demonstrated strong communication and interpersonal skills while effectively collaborating with students, parents, and colleagues to create a positive and conducive learning environment.

PROJECTS

Portfolio Website | HTML, Tailwind CSS, JavaScript

batzaya.netlify.app

Designed and developed a responsive full-stack portfolio website using **Tailwind CSS** and modern JavaScript to showcase projects and professional experience. I built interactive, mobile-optimized UI components and implemented a clean component architecture to ensure high performance and a polished user experience across all devices. Source code for the website can be viewed [here](#).

BuzzBistro Food Ordering Platform | React, Tailwind, MongoDB, Node.js, Stripe

buzzbistro.netlify.app

A complete food ordering website with user authentication, shopping cart, admin panel, backend server, and Stripe payment integration. Tools used React.js, Tailwind.css, MongoDB, Node.js, Stripe. Source code for the front-end, backend, admin panel can be viewed [here](#).

AWS AI Practitioner Exam Prep | Next.js, React, TypeScript, Tailwind CSS, YAML, AWS

aif-c01.netlify.app

Developed a full-stack study web application for the AWS Certified AI Practitioner (AIF-C01) exam using Next.js App Router and React, supporting 300+ YAML-based practice questions.

Built interactive learning features including flashcards, bookmarks, timed exam simulation, scoring, statistics dashboard, keyboard shortcuts, and persistent local storage support.

Implemented optimized search indexing, server-side caching, responsive UI design, dark/light themes, and modular TypeScript components to improve scalability and user experience. Source code for the website can be viewed [here](#).

Purev Style Remodeling | *React, Tailwind CSS, JavaScript*

purevstyle.netlify.app

Designed and developed a responsive professional service website for a DMV-based remodeling firm, featuring a categorized project portfolio and lead-generation contact forms. I built a modern, mobile-optimized UI using Tailwind CSS, focusing on high-performance image rendering and seamless navigation to showcase luxury renovations. This implementation improved user engagement by introducing structured service catalogs and clear calls-to-action for kitchen, bathroom, and basement remodeling services. Source code for the website can be viewed [here](#).

EDUCATION

University of the Potomac

Washington DC

BS in Information technology (GPA: 3.74)

Graduation Date: December 2024

- Relevant Coursework: Introduction to Data Communication and Networking, Introduction to Programming & Logic, Introduction to Database, Computer Systems Technology, Systems Analysis and Design, Database Management, Network Security Management.
