WORK EXPERIENCE

Tech2High

Falls Church, VA

Junior web developer

Sep 2020 – Present

- Incorporated Google Analytics into the site, leading to optimization of marketing efforts and a 30% increase in traffic
- Involved in the successful redesign of the website UI using HTML/CSS, resulting in a 25% increase in user footfall
- Regularly researched Industry Trends and applied Best Practices in frontend development.
- Identified and resolved website performance issues translating in significant latency reduction by 40%
- Documented codebases for easier maintenance and scalability.

Arlington, VA

Math tutor

June 2017 – Present

- Tutored over 300 students in SAT Math and Calculus, helping them improve their scores and achieve their academic goals.
- Developed and implemented an engaging robotics curriculum, teaching block coding to elementary and middle school students, fostering a passion for STEM education for Sylvan Learning.
- Demonstrated strong communication and interpersonal skills while effectively collaborating with students, parents, and colleagues to create a positive and conducive learning environment.

PROJECTS

My portfolio website

baz-portfolio.netlify.app

Created a responsive portfolio that can show my current projects and introduction. Tools used React.js, node.js, CSS. Source code for the website can be viewed [here](#).

BuzzBistro Food Ordering Platform

buzzbistro.netlify.app

A complete food ordering website with user authentication, shopping cart, admin panel, backend server, and Stripe payment integration. Tools used React.js, Tailwind.css, MongoDB, Node.js, Stripe. Source code for the front-end, backend, admin panel can be viewed [here](#).

To-Do List App (Task Management App)

buzztodo.netlify.app

Developed a fully functional To-Do List web application using **React.js** and **Tailwind CSS**. The app allows users to add, edit, mark tasks as complete/incomplete, and delete them from the list. Tasks are stored locally in the browser to persist across sessions. Source code for the website can be viewed [here](#).

EDUCATION

University of the Potomac

Washington DC

BS in Information technology (GPA: 3.74)

Graduation Date: December 2024

- Relevant Coursework: Introduction to Data Communication and Networking, Introduction to Programming & Logic, Introduction to Database, Computer Systems Technology, Systems Analysis and Design, Database Management, Network Security Management.
